Geotechnik

Institut für
Geotechnik

The Institute for Geotechnics at Vienna University of Technology, Research Centre for Ground Engineering, Soil and Rock Mechanics (Univ.-Prof. Dipl.-Ing. Dr.techn. Dietmar Adam) and the Institute for Geotechnical Engineering at the University of Siegen (Univ.-Prof. Dr.-Ing. Richard A. Herrmann) host the

2nd Symposium
Ground Improvement in Geotechnical Engineering
on 13th and 14th September 2012
at Vienna University of Technology

Topics:

- New developments and advancements of soil improvement methods, e.g. CSM, Mixed-in-Place, hybrid systems, vakuum consolidation
- Dynamic soil improvement, e.g. deep vibro compaction, heavy dynamic tamping, impulse compaction, dynamic compaction with rollers
- Ground freezing
- Soil improvement - soil stabilization
- Ground improvement using geosynthetics
- Analysis and design principles
- Construction and rehabilitation measures
- Inspection and quality assurance

Demonstration of equipment and techniques in the scope of an exhibition.

Abstracts (maximum one DIN A 4 page) shall be sent to the following postal or mail address until

16th December 2011

Technische Universität Wien, Institut für Geotechnik, Karlsplatz 13/220, A-1040 Wien
